

**COMTES FHT®**

Complete Technological Service - Forming, Heat Treatment

## VACUUM INDUCTION MELTING FURNACE

VIM furnace can be used for melting and casting of steels and non-ferrous alloys in two operation modes:

- Melting without vacuum/protective gas (remelting of scrap etc.)
- Melting in vacuum or inert atmosphere (alloys with precise chemical composition)

### Basic technical parameters

- Two crucibles available (capacity 6 / 60 litres)
- Max. vacuum level 10 Pa
- Max. overpressure 0,2 MPa
- Max. temperature 1650 °C
- Alloying / taking of specimens under vacuum or protective gas

### Standard moulds / ingots

**Round ingot 450 kg**

Dimensions Ø 210 x 1230 mm

**Round ingot 50kg**

Dimensions Ø 110 x 720 mm

**Flat ingot 500 kg**

Dimensions 160 x 300 x 1400 mm
